

Problem Solving

Why Problem Solving?

Simply, it is very important in our life as we all face problems every day, so these problems should be solved to have a better life.

If you are a student, you need to acquire problem solving skills to overcome the problems during studying your school subjects such as mathematics and physics. If you are an employee, you need to acquire this skill to deal with different problems; for example, how to deal with a nervous manager? or how to keep your job when facing a lot of challenges? If you are manager you need to overcome the financial crisis and the problems that happened among the employees. That is why we need to think about problem solving.

Finally, we could say that every person needs to know how to deal with the problems in his life using specific techniques.

The purpose of problem solving

We would like to make a difference in our society by applying problem solving techniques as there many different cases need them; for example:

- The enterprises' problems such as financial crisis we need to increase the profit, improve employee efficiency by giving them a training to develop their skills and abilities, and try to spread the business ethics and apply it in all companies and foundations.

- Start-ups which face many problems at the beginning, we need to help them to have a vision that matches their potentials; for example, helping them to implement a successful marketing plan or innovate in a new product.

- The educational problems such as the number of students in class rooms and the out dated school subjects as we could solve this problem by teaching the students in a distinctive and different ways; for example, Teaching them how to think about the future, and how to plan for their goals, we also need to apply soft skills in the schools so students could: communicate with other people and lead the society in the future, finally we should help them to discover themselves and the passions they have by encouraging them to choose the career that matches them.

- In conclusion we need to help everyone to solve problems through his life, whether he is a student, employee, or an entrepreneur, he should know about problem solving techniques.
