(CNN) —

As their work life went remote and social plans ground to a halt during the pandemic, many mens' facial grooming routines took a bit of a nosedive. After all, if you don't have to go into the office and you can't visit friends and family, pop into a coffee shop or even work out at the gym, why bother shaving every day?

In fact, if you spent the lockdown growing an impressive, playoff-style beard, you're in good company. Celebrities including our own Jim Carrey grew thick bushy beards and embraced their natural wild man look during the last year. Carrey even encouraged his fans on Twitter to work on their own beards by sharing the hashtag #letsgrowtogether. Even Prime Minister Justin Trudeau has let his salt-and-pepper facial hair grow out and has sported an ever-growing beard in his regular news briefings.

One thing is for sure: Although the beard may be here to stay at least for a little while longer, it does need to be kept well-groomed and maintained properly in order to look and feel good. Check out these top beard care products to maintain your whiskers and keep you looking suave.
