Northern Lights Autoflower Grow Time - Lst during flowering stretch

CLICK TO VISIT OUR ONLINE SHOP: https://t.co/Fkifs5YDaM

Northern Lights Auto is an exceptionally tough autoflower that requires very little maintenance while being able to withstand harsher climates with ease, this plant can grow up to 120cm and produce around 600gr/m2 in less than 65 days. Northern Lights Auto courtesy of MissJokerSmoker. For an autoflower, Northern Lights Autoflowering can reach an impressive height of 120cm and she can do it very fast in only 9 weeks from seed to harvest. Because of her good size for an autoflower and some massive buds, she can give you as much as 200g of some aromatic and resin-oozing NL goodness if you grow her in good conditions. What do you have planned for this weekend? Let us know below! ?????? Find time to

quite the noise with @dbl.canada #dontbeloud #prerolls #canadaprerolls

Northern Lights Autoflower southerngrower2020 This was my first ever grow attempt. The GH products were relatively easy to use, although investing in a Bluelab TDM and PH probe were critical for stability. Grow techniques: Grow indoors and get multiple cycles each year with this fast growing and flowering strain. Northern Lights is well suited for the SOG (sea of green) method, and as a hydroponic ...
