Hello afn although my grow until now was amazing and the lady is huge if we consider the 3 gallon pot, yet in week 12 , she still drinks water like crazy full of white pistils and new ones and almost no amber trichs. Is it normal to take so long for an auto? should I start flushing or what. Does... Autoflowering plants as we have determined earlier grow best when you give them between 18 and 24 hours of light each day but there are many circumstances when a grower need to give his plants only 12 hours of light. And today I will try to explain the what, why and when about autoflowers and 12/12 (day/night) light cycle. First of all I need to say that you can absolutely grow autoflowers on ... #weedsociety #weedlife

Northern Lights Auto is one of the most popular indica dominant cannabis cultivars worldwide, due to its resistance, rapid flowering, and many resinous buds. He has Afghan and Thai roots. Its aroma is sweet and rich, and the smoke gives a euphoric and relaxing effect. This variety officially appeared in the 1980s in the Netherlands. The best characteristic of Autoflowers is that the light schedule does not require being 12/12. This means you can optimize the light on the plants for 18/6 to 24/0 for maximum yield per square foot. How to begin. I got my Northern Lights Autoflower seeds from Growers Choice. It shipped within a week, and I was able to start the process within ...

LIGHT SCHEDULE FOR AUTOFLOWERING STRAINS. As the name suggests, autoflowering strains don't require a change in the light cycle to enter the flowering stage. Many growers choose to keep their autoflowers on a light schedule of 18 hours on and 6 hours off during the entire growing cycle. Other cultivators choose to keep their lights on around the clock in hopes of maximising photosynthesis ... #legalleen #cloudninesyrup #cbdsyrup #thc #cbd #cbdlean #danklean #cbdprime #akalean #cloudnine #cleancarts #thccart #muhameds #liveresin #distillate #thcvapepen #420 #710 #weedthailand #bong [look at this web-site](#)
