INTRODUCTION

This white paper provides a reader-friendly description of a decentralized Ethereum & Solana Blockchain cryptocurrency. We are developing an environment that will bring interest to token holders as well as an opportunity for everyone to enjoy digital assets in the form of NFT, as well as a reward system in our ecosystem.

Thee Token will be a whole ecosystem that will provide features like Staking , NFT ecosystem, and Rewards. Thee Token will develop its own unique NFT collection and will connect the decentralized community. Our NFT collections are unique in that only one may exist, and they are difficult to duplicate. As a result, it's safe to suppose that you'll be one of the few people who have these treasures.

Staking will allow users to earn yield in a form of Thee Token. We are revolutionizing the market with a more open, accessible, and fair global financial system with a decentralized Blockchain-powered crypto swapping. Unlike, other conventional platforms, our wallet allows investors to generate more value to user's crypto-assets.

Staking rewards are an incentive provided by blockchains to participants. Each blockchain has a predetermined number of cryptocurrency incentives for validating a block of transactions.

OUR MISSION

Thee Token is a decentralized platform built on Ethereum & Solana blockchains with a mission to create a community-driven ecosystem that empowered the holders to better their financial condition. Our mission has always been to make it as simple as possible to buy and sell cryptocurrency, while also being a leader in security, reliability, and custody as well as helping the community people at the same time.

- Operate as a community-focused and community-driven digital asset, fully decentralized in every sense of the word.
- Provide every holder with simple and effective ways to gain exposure to digital assets.
- Decrease volatility and increase positive price pressure in digital asset staking.
- Lower the barrier for entry to a more advanced financial ecosystem.
- Stake your NFT, earn tokens and use it on our own marketplace to buy or sell different things.
- Our mission is to create a unique reward system for holders.
- ETH & SOL Blockchains and languages are available.

VISION

The Thee Token network is built with no restrictions in mind, allowing users to friendly, and transparent Platform. We will develop a novel ecosystem to bring more people into digital assets. Thee Token will create new standards in crypto space and worked on two blockchains. Thee Token is going to create a revolutionary ecosystem to bring more people into digital assets, helping to earn a passive income through redistribution/reflection, by stake the token long-term, along with maintaining their privacy, security, and autonomy along with digital and social problems. Our NFTs will bring more utility to the token and will grow with arts from the community. We envision to create an android and Apple aap for users. We also envision creating a revolutionary multi-wallet system for our stakeholders. We strive to create an ecosystem based on sound monetary policies, with a sound and solid decentralized foundation, that should be expected with the Thee Token digital asset.

CORE VALUES OF THEE TOKEN

INTERCONNECTIVITY

Simply said, every component of a system interacts with and is reliant on the others. Thee Token believes in building a linked system of mutual trust and trustworthiness, where the sum of its parts is more than the sum of its parts.

TRANSACTIONAL FREEDOM

One of Thee Token's greatest advantages is that it may be used to exchange value between two parties. This can be done without the involvement of a third party, making the transaction more open and resistant to censorship.

FRACTIONAL OWNERSHIP

Each token can easily represent a fraction of the total value of an asset. This lowers the hurdles to entry and allows everyone to own a fraction of an asset like a property or an NFT, making the business more accessible to investors. They could also refer to the right to a percentage of the earnings on an asset's value, or even voting rights in the case of equity in a company.

THEE STAKING

Thee Token works on both Ethereum and Solana blockchain system, which is eco-friendly, working on a proof of stake, staking ensures users' funds are safe by leveraging effective security measures and providing Secure Asset Fund for Users (SAFU). Our staking method at the time of writing is arguably one of the safest and most eco-friendly methods (for cryptocurrency) to earn passive income. 0.5% of fee will go back to our staking community.

The platform stores all staked coins using a secure wallet and a double-checking system. As more and more people, including institutional investors, realize the crypto market's lucrativeness, crypto staking is fast becoming a trend of earning passive income by simply holding or locking funds in a wallet. Since staking cryptos requires some technical crypto know-how and damming requirements, Thee Token staking platforms come in handy to allow investors, even those without technical knowledge of cryptos, to stake PoS Tokens and earn rewards. For only a percentage of your staking rewards, the staking platform lends you their technical expertise and validates stakes on your behalf, enabling you to earn passive income. The substantial growth of crypto staking has seen a boom in staking platforms allowing investors to earn staking rewards seamlessly. If you're thinking of making passive income through staking Then Thee Token is a fantastic option.

BENEFITS OF STAKING

NO HARDWARE IS REQUIRED

Unlike proof of work, there is no need of specific equipment or hardware for crypto staking. Proof of hold works with no equipment requirements. The only requirement is to hold the TOKENS for an interval of time by the holders on any exchange.

PASSIVE INCOME

Stakeholders earn incentives by holding and controlling their digital wealth. Passive income for the beneficiary is the reward of holding.

SCALABILITY

In the Blockchain world, scalability is a concept that is often used. It refers to a computational process's potential to be used do generate in a variability of ways. Proof of holds protocols, as shown by Thee Token higher transaction outputs and lower fees, make for greater scalability.

ECO-FRIENDLIER

One of the major benefits for staking Token is that it dont needs a continuous supply of energy to validate the Transaction. So it is eco friendly in nature.

MORE COST-EFFECTIVE

Proof of hold blockchains are always inexpensive and less energy-consuming platforms with no particular and expensive hardware requirements. Unlike proof of work chains, PoS is more cost-effective and eco-friendly. So, the holders can earn more passive income by using the SCI platform.

HIGHLY SECURED WITH THE HELP OF SMART CONTRACT

The biggest issue in the modern world is security and privacy, and Thee provides a swift and stable portal that is backed by the Thee Token ecosystem making him superior to others. Thee Token is offering a highly secure and fast platform to the users for holding crypto.

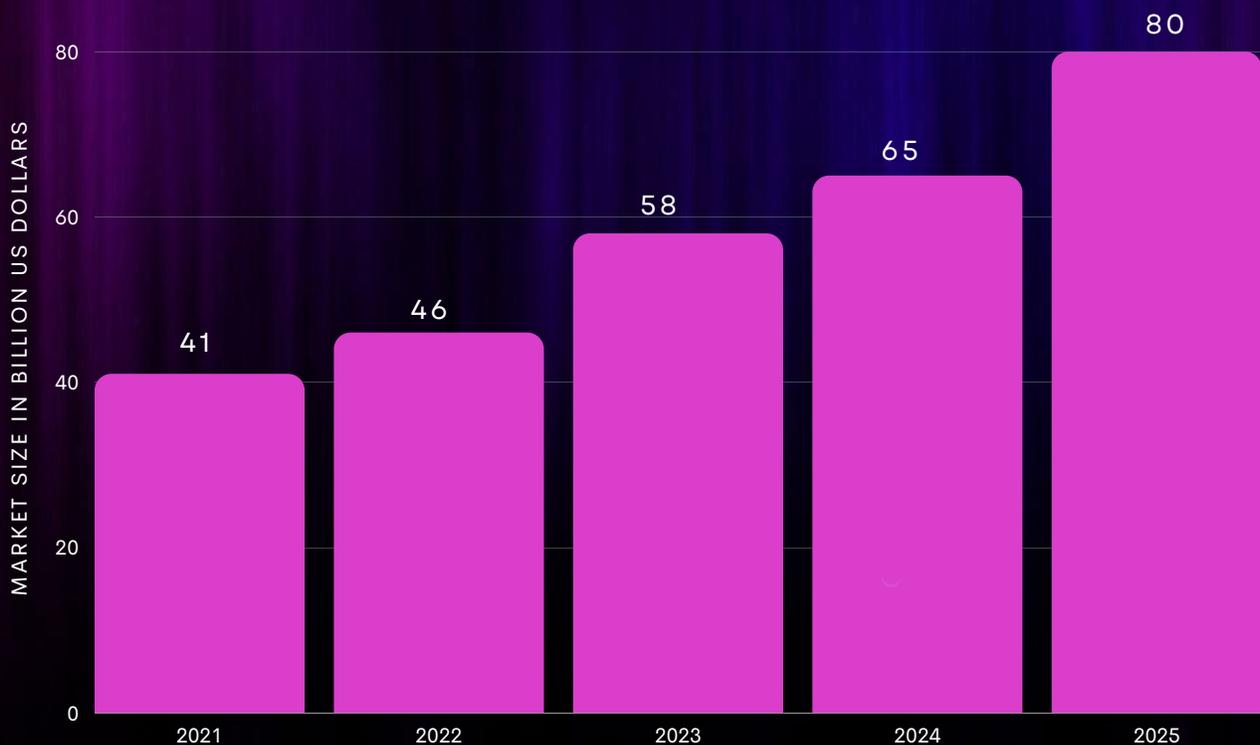

Global NFT Marketplace

According to a recent estimate from blockchain analytics firm Chainalysis Inc., about \$41 billion worth of crypto was connected with smart contracts related with NFT markets and collections from the beginning of 2021 until mid-December.

Last year, the popularity of non-fungible tokens (NFTs) skyrocketed, with multimillion-dollar sales and celebrities like musician Shawn Mendes, socialite Paris Hilton, and former first lady Melania Trump are on board.

The NFT market is predicted to expand at least 33% annually, reaching \$80 billion in net sales volume by 2025 and almost \$350 billion by 2030. Though this may appear to be a large amount, we are convinced that the market's real growth will much exceed the investment Jefferies' forecasts.

NFTHEE

NFTThee is a vital part of our ecosystem dealing with NFT'S. NFTThee are unique, non-interchangeable assets, minted on-Blockchain. These will be linked to anything from the digital NFTThee. The core attributes of NFTThees give them unique value and categorically separate them from other types of assets. These properties include being verifiably unique and indivisible. The transparent nature of the underlying code means that the scarcity and ownership of any given token are evident without the need for a trusted intermediary.

We view the emergence of NFTs as a continuation of a paradigm shift from centralized to decentralized systems. This framework is now unlocking fresh business models for the creators of digital and physical collectibles. Thee Token is a widely known NFT project. The underlying token for each NFTThee encodes a unique genome that defines its appearance, traits, and hereditary lineage. Thee Token cannot be replicated and cannot be transferred without the user's permission.

NFTHEE MARKETPLACE

NFTs are rapidly sweeping the world of digital art and collectibles. Digital artists' lives is being transformed as a result of massive sales to a new crypto-audience. Non-fungible is an economic word that can be used for objects like furniture, music files, and computers. Because of their unique features, some goods cannot be substituted for other items.

Fungible goods, on the other hand, can be swapped because their worth, not their unique features, characterizes them. At any given time, an NFT can only have one owner. The unique ID and metadata that no other token can replicate are used to manage ownership. Smart contracts that assign ownership and govern the transferability of NFTs are used to create them.

The NFT technology gives you the peace of mind that no matter what happens to the blockchain, nodes will always be operational. As a result, nothing can really happen to the information. This is due not only to the money they produce, but also to the money they safeguard.

BENEFITS OF NFTHEE

SECURITY

The NFT technology gives you the peace of mind that no matter what happens to the blockchain, nodes will always be operational. As a result, nothing can really happen to the information. This is due not only to the money they produce, but also to the money they safeguard.

COPYRIGHT

One of the most significant benefits of the NFT technology is that it allows artists and content creators to keep full copyright ownership. In most licencing agreements, this is not the case. This permits them to continue to make money without having to give up their copyrights.

RESELL ABLE

The majority of people will get involved with NFTs in order to make money. Reselling them is a lucrative business for many people. Investing in NFTs for resale value can result in massive gains.

UNIQUE

They are unique in that only one may exist, and they are difficult to duplicate. As a result, it's safe to suppose that you'll be one of the few people who has these treasures.

MULTI-WALLET SYSTEM

Wallets are applications that let you interact with your crypto account. Think of it like an internet banking app – without the bank. Your wallet lets you read your balance, send transactions and connect to applications. You need a wallet to send funds and manage your Thee Token.

Your wallet is only a tool for managing your Thee account. Thee Token system works on multi-wallet linking system that make Thee Token unique and different. Wallets are important to improve your transaction system and make it outstanding.

- A wallet account is an entity that can send transactions and has a balance.
- A wallet account has a blockchain address, like an inbox has an email address. You can use this to send funds to an account.
- A wallet is a product that lets you manage your wallet account. It allows you to view your account balance, send transactions, and more.

Metamask:

A crypto wallet & gateway to blockchain apps, Start exploring blockchain applications in seconds. Trusted by over 21 million users worldwide.

Trust Wallet:

Trust Wallet is a decentralized multi-coin cryptocurrency wallet. Buy crypto, explore DApps, swap assets, and more while keeping control of your keys.

- In a decentralized wallet, you hold the keys to your cryptocurrency wallet.
- A user controlled wallet, only the user has control over their funds.
- Has access to DApps unlike centralized wallets.
- Does not keep any personal information.
- The main goal is Making Crypto More Accessible.

Phantom:

A friendly crypto wallet , Phantom makes it safe & easy for you to store, buy, send, receive, swap tokens and collect NFTs on the Solana blockchain.

ICO OPPORTUNITY

Initial Coin Offerings (ICOs) are a relatively new method of funding new businesses and initiatives. A cryptocurrency and blockchain initial coin offering (ICO) is a sort of capital-raising operation. The ICO is a type of initial public offering (IPO). Thee Coin will also provide all participants with the possibility to participate in an ICO.

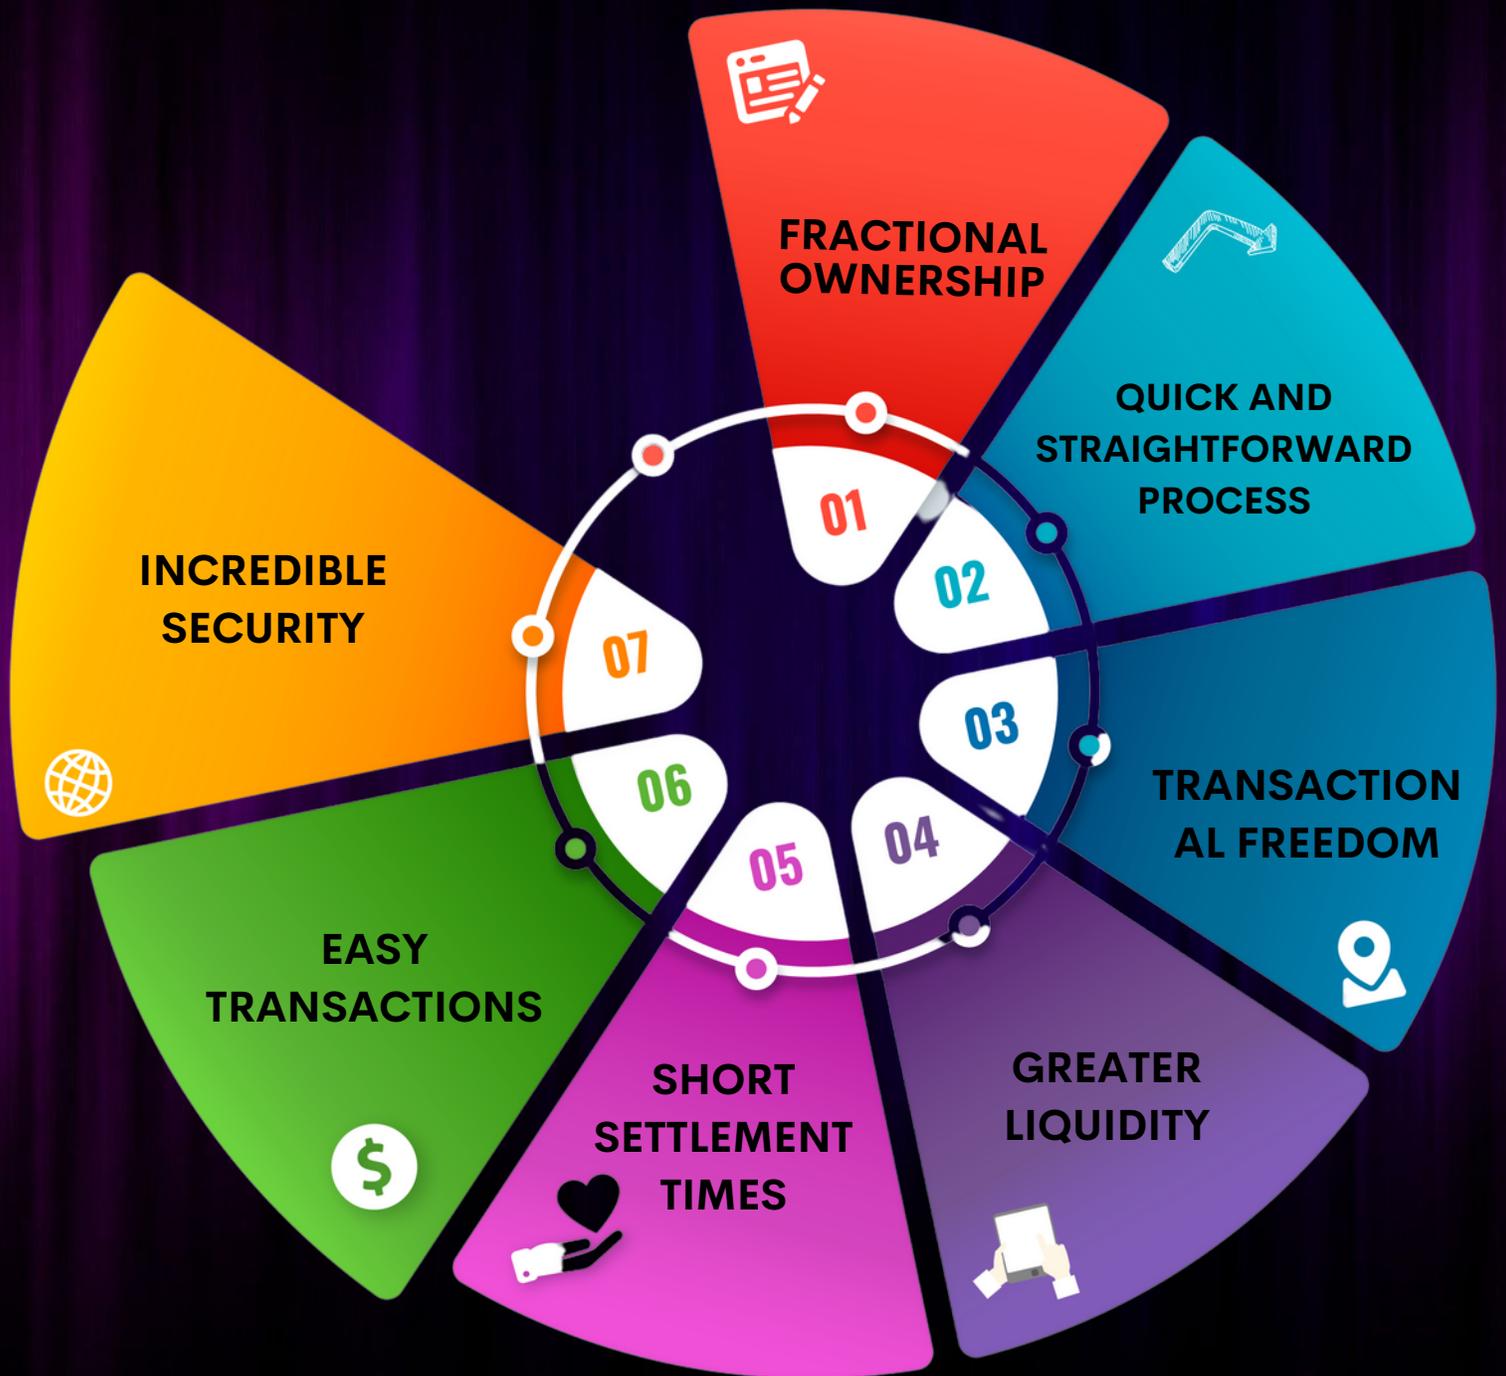

Thee Token ICOs have the primary advantage of eliminating intermediaries from the capital-raising process and establishing direct relationships between Thee Token and investors. Furthermore, both parties' interests are linked.

- In our ecosystem, initial coin offers (ICOs) are a popular way to raise funding for cryptocurrency-related businesses and services.
- ICOs are comparable to initial public offerings, except that the tokens issued in an ICO can also be used to purchase a software service or product.
- Thee Token ICO has provided investors with enormous gains.
- To take part in an ICO, you must first buy a more established digital currency and have a basic understanding of cryptocurrency wallets and exchanges.
- Because thee Token ICO is largely unregulated, investors must exercise extreme caution and diligence when investigating and investing in ICO.

WHY SHOULD YOU INVEST IN THEE TOKEN?

WHY SHOULD YOU INVEST IN THEE TOKEN?

INCREDIBLE SECURITY

Thee Token prefers to employ secure Platforms like open-sea and raribles because our platform is based on blockchain security. This could be one of Thee Token's most reliable advantages. Unlike other platforms, it is more secure.

EASY TRANSACTIONS

Transactions can be carried out quickly, at a cheap cost, and in a more private manner than most other types of transactions. Anyone can send and receive a variety of NFTs using a simple smartphone app, hardware wallet, or exchange wallet.

SHORT SETTLEMENT TIMES

While some people are just interested in investing in our ecosystem for the sake of capital gains, others may benefit from the opportunity to use tokens as a medium of exchange.

GREATER LIQUIDITY

Thee Token will enable us to extract liquidity from illiquid assets that are physically tough to divide. Tokenization will increase liquidity by allowing us to buy or sell a fraction of an asset, such as NFTs, and will lock up funds rather than the investor.

WHY SHOULD YOU INVEST IN THEE TOKEN?

TRANSACTIONAL FREEDOM

One of Thee Token's greatest advantages is that it may be used to exchange value between two parties. This can be done without the involvement of a third party, making the transaction more open and resistant to censorship..

QUICK AND STRAIGHT FORWARD PROCESS

A Thee Token transaction is usually a simple and quick process. NFT can be moved from one digital wallet to another, for example, with just a smartphone or PC.

FRACTIONAL OWNERSHIP

Each token can easily represent a fraction of the total value of an asset. This lowers the hurdles to entry and allows everyone to own a fraction of an asset like a property or an NFT, making the business more accessible to investors. They could also refer to the right to a percentage of the earnings on an asset's value, or even voting rights in the case of equity in a company.
