

## How To Replace Your Headlights in 8 Steps

Hey, Imagine you are driving for a long trip midway or some emergency work suddenly your headlights stop working? Complete horror story right? So it is very important to know how to replace your headlights in case of an emergency. Don't worry now you are at the right place where you will get some expert opinions. Keep reading the blog post.

### **Observation is key**

If you see your headlight is not working, first put the lights on. Then tap on the light with your fist sometimes it works. It is a filament problem. But if you see only one bulb is out, it is time to replace the bulb.

#### **1. Use gloves and goggles**

Nothing is more important than your safety. It will help you protect yourself from unwanted dirt and oil.

#### **2. Stop Your engine**

Turn off your car and wait for cooling down

#### **3. Lift the hood section**

Lift the hood section and observe the headlight

#### **4. Remove wire connections**

Remove the wire connections that are attached behind your headlight.

## **5. Disconnect your previous headlight bulb**

Now don't forget to put on glass and gloves and remove your previous damaged bulb and replace it with a new bulb.

## **6. Reconnection**

Now it's time to reconnect all your cables.

## **7. Check out a new connection**

Now check whether your new bulb is working or not. If it's not working, check again thoroughly.

## **8. You are smarter than you think**

Now you have successfully installed the replacement bulb and please don't forget to appreciate your hard work.

Hope now you are more confident about what to do in case of an emergency. If you need further assistance you may contact me here. We are happy to help you.

Till then take care and keep shopping guys.
