49.00 € Anapolon 50 mg Prime quantity Add to cart Buy in one click Note! If the amount of your check is more than 300 euros. We will deliver the goods to you for free! from 200 to 300 euros - delivery cost 25 euros. Orders up to 200 euros - delivery 45 euros! This instruction is just a short supplement to the official instruction. Typically, the initial dosage of Anadrol is 50 mg per day. Some may need a dosage increase of up to 150 mg per day. Before increasing the dosage, you should wait at least a couple of days to make sure that you really do not have enough current dosage of the drug. The duration of Anadrol intake should not exceed 4-6 weeks.

How To Cycle Anapolon? It is recommended that you do not cycle Anapolon for longer than 6 weeks, the usual cycle would be between 4-6 weeks. As for the dosage, it is recommended that you stick to a dosage of 50 mg daily, never exceeding 100 mg daily. You may think that increasing the dosage would

result in better results, but this is not the case. [find out here now](#)

Anapolon (also known as Oxymetholone and Anadrol) is a synthetic anabolic steroid developed in the 1960s by Syntex Pharmaceuticals. Available in 50 mg tablets and is one of the strongest steroids available, at the same time, the drug can cause some side effects that are common to all anabolic steroids.
