## Trenbolone Cycle - Putting Together The Perfect Cycle - Anabolicco

**Products:** 250 tablets stanozolol 5 mg  
100 tablets mesterolone 25 mg  
20 mL trenbolone acetate 75 mg/mL

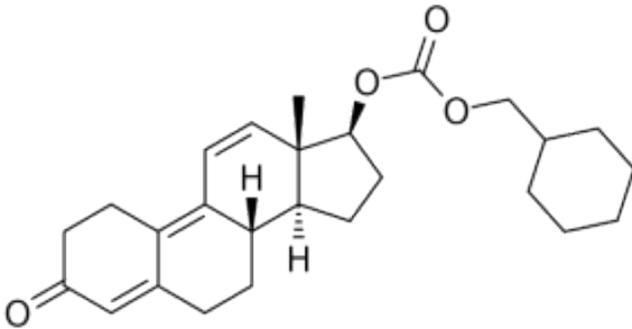

**All Weeks:** Liver Support: Liver Stabil, Liv-52, or Essentiale Forte (label recommended dosage).  
Cholesterol Support: Lipid Stabil (3 caps/day) and Fish Oil (4g/day).

**Comments:** Stanozolol and trenbolone are popular steroids during cutting phases of training, and impart strong anabolic and moderate androgenic effects with no significant estrogenicity. This combination helps to impart a strong fat loss/definition-enhancing effect. Two 25 mg tablets of mesterolone have been added per day to supplement additional androgenic activity, which should help maintain normal libido and sexual functioning. Additional anti-estrogenic drugs should not be necessary. Some more aggressive competitive bodybuilders may enhance this cycle by adding rHGH, clenbuterol, and/or thyroid hormones. Higher doses of the individual steroids may also be used, but are expected to impart stronger cardiovascular and hepatic strain, and are generally not advised.

Week	Stanozolol	Mesterolone	Trenbolone
