1/4 cup whole flaxseeds
2 cups water (I use filtered water)

You will need:

A small saucepan

A bowl

Something to strain your gel, either a wire/mesh strainer or a new pair of knee highs

The container you will store your gel in

Combine the flaxseeds and water in a small saucepan and I think that the setting should be on about medium high heat.

Stir the mixture constantly as it slowly boils, you'll know that the seed are releasing their wonderful mucilage when your mixture has a "foamy white layer" and it looks and feels a little thicker as you are stirring it.

I know that it's tempting to make it higher. When this might wash away and So, the foam released, if your mixture so you are strain your knee high

I use a stocking much easier of the knee of a small to squeeze stocking in first strain thinner than

I store my gel in the refrigerator lasts for about 2 weeks before throw away what is there a
