

# Cannatini™

INFUSED ADULT CHEWS

## THE CANNATINI DIFFERENCE

At Cannatini, we envision a world that reaches “For Higher Spirits.” A world with better flavors and fewer hangovers, where people drink less and chill more. Our mission is to bring cannabis into the mainstream with unique, adult-themed flavors, 5mg at a time. In service of that goal, we’re focused on exceeding expectations in two main areas:

### FLAVOR

The Cannatini line was developed through exhaustive testing and refinement in the crucible of today’s retail cannabis market. By experimenting with over 100 formulations, specifically designed for the adult palate, we know what it means to put flavor first.

### CONSISTENCY

Put simply, consistency builds trust. As consumers expand their cannabis horizons, they want to know that they can count on getting the same experience every time. From flavor and texture to dose and quality, Cannatini Adult Chews always deliver.

**Prickly Pear Martini**

**Tropical White Sangria**

**Cranberry Lime Mojito**

**Wild Strawberry Bellini**

**Apple Martini**

**Spicy Strawberry Margarita**

**Sour Grape Sangria**

## INFUSED ADULT CHEWS

### A NEW TWIST ON CANNABIS

Cannatini was made by adults for adults. Breaking out of the typical cannabis product mold, Cannatini is for adults looking for the best tasting, consistently dosed, high-quality cannabis-infused products. Perfect for a night out or intimate gathering, Cannatini is here to bring better vibes, fewer hangovers and a smooth, delicious cannabis experience.

### WHAT'S IN THE CAN

When it comes to edibles, we believe that cannabis should be felt and not tasted. Cannatini Adult Chews are infused with highly-refined cannabis distillate and organic fruit extracts so every bite is packed with delicate fruit flavors without the lingering aftertaste of distillate. So just what can you expect?

**Apple Martini** - Sour apple and sweet citrus flavors

**Cherry Lime Martini** - Sweet cherry and tart lime flavors

**Prickly Pear Martini** - Prickly pear accented by the fruitiness of pear and floral notes

**Tropical White Sangria** - Mild wine flavor coupled with the sweetness of pineapple, pear and cherry

**Wild Strawberry Bellini** - Dry champagne flavor and effervescent bubbles with the sweetness of strawberries

**Dosage** - 5mg per piece Adult Use/Med. 25mg per piece Med Only

**Start Low Go Slow** - Edibles can take up to a couple hours to set in. If you're new to cannabis edibles start with a single piece and wait at least that long before deciding if you want to try another.

**Processed differently by the body** - When eaten, THC is processed by the liver where it's converted to 11-hydroxy-THC. It is believed that in this form, THC actually becomes MORE bio available than when smoked. Which explains why the effects can take much longer to kick in but can hit so hard once they do.

**Additional Formulations** - In addition to our standard "Hybrid Effect" chews, we also offer other formulations featuring specific cannabinoids and effects:

**Delta-8:Delta-9 1:1** - Delta-8 THC is reported by users to produce mental clarity, focus and energy while Delta-9 THC is the primary cannabinoid that gives cannabis its psychoactive effects.

**CBD:Delta-9 1:1** - CBD is reported by users to help mitigate pain and inflammation and help regulate mood while Delta-9 THC is the primary cannabinoid that gives cannabis its psychoactive effects.
