

Bitdefender

Bitdefender is a Romanian cybersecurity powerhouse who has dominated the industry by producing and selling a wide range of cutting edge, state of the art products tailored to suit an impressive number of devices at a time. With 18 years of experience in developing and offering stellar security products, they are a cut above the rest and the obvious choice when looking for a reliable and capable security software, which time after time proves its efficacy. Having multiple awards under their belt year after year, Bitdefender is the revolutionary choice which uses artificial intelligence (a machine intelligence capable of foresight), and in so doing, recognizes threats before they cause damage; immediately prohibiting even the newest threats seamlessly and quickly.

Dominating 38% of the world's security systems and 500 million users worldwide, Bitdefender offers: anti-virus, internet security and endpoint security software which highly successful at protecting against viruses, worms, trojan horses and all other forms of undesirable intruders which corrupt a devices operating system. With products ranging from basic, complete and advanced there is a product for every need and pocket.

The basic Antivirus Plus allows you to connect up to 3 devices and although it does not offer protection for Mac, Android, and iOs, its Windows protection is excellent and resolute. The Complete Total Security package allows connections of up to 5 devices including Mac, Android and iOs protection making it the better option for users who use different devices, but who still need the same unwavering Forte Knox-like protection throughout. The last product is the Internet security package which allows for up to 3 devices to connect. This software does not allow for Mac, Android, and iOs protection but only Windows.

Whatever your needs are, each product is offered at an annual subscription having in-built automatic upgrades to the latest version, ensuring that you can enjoy full protection throughout the year without the inconvenience of waiting for an upgrade to be manually done. They also have multi-layer ransomware protection which informs you of any attacks and prevents the loss of money on files. Zero system slow-downs enable for an instant reaction to malware and webcam protection preventing encroachment on privacy.

Bitdefender has come a long way since 2001 and they owe a lot of their success to their innovation and appetite to go beyond the mediocre cybersecurity expectations and bring protection second to none. Not so long ago they partnered with the FBI, Europol and other agencies to release a free decryption tool for Grandcrab ransomware, allowing ransomware victims to retrieve their encrypted data for free. This just proves how Bitdefender is always looking for ways to protect their client on every level at all times.
