ABOUT US

Infection Prevention

Make CAUTI prevention second nature

Empower frontline staff with proven strategies to help stop infection.

[Request a discovery assessment](#)

Discover a holistic approach to CAUTI prevention

The best way to lower the risk of CAUTIs is to reduce the use of Indwelling Urinary Catheter (IUCs), limit IUC duration and follow aseptic technique. But when frontline staff is pressed for time, they may not always follow aseptic technique or choose a safer alternative to an IUC. Our Urological Solution makes it easy for clinicians to do the right thing and lower the risk of infection. From best practice guidance, education and the right system of products, we empower frontline staff to create a culture of safety.

Explore our Urological Solution

Best Practice Guidance

Insights that help staff use consistent, evidence-based best practices for CAUTI prevention.

[Learn more](#)

Education and Training

Ongoing education developed by clinicians that builds sustainable knowledge to help fight infection.

BEST PRACTICE GUIDANCE

Reduce the use of IUCs with a consistent approach to prevention

Our goal is to identify opportunities to standardize processes and promote the proper use of IUCs and aseptic technique. Following our discovery assessment, we make actionable recommendations to drive better clinical outcomes. Choose a virtual assessment or a hybrid of on-site and virtual reviews, including:

- Interviews with leaders and staff
- Observations of catheter insertion
- Practice audits of catheter care and maintenance
- Product utilization reviews of all urological nursing products
- Storeroom reviews

EDUCATION AND TRAINING

Improve outcomes with education and training

Every day, caregivers are challenged to prioritize CAUTI prevention while coping with different care challenges and limited resources. Responding to these challenges, our educational tools help keep patient safety top-of-mind. Discover materials for every learning style and skill level.

Online resource center

- Medline University courses
- Best practice videos
- Industry guidelines
- Training refresh tool such as posters

Pre-built, facility led education

- 24 months of train-the-trainer education with PowerPoint presentations, bulletin boards and other activities
- Short, theory-based learning modules with teaching points
- Discussion guides and activities to reinforce concepts

Don't have a CAUTI prevention team? Our playbook has everything you need

- Team identity and engagement
- Facility support and commitment
- Budgeting and recruitment
- Meeting agenda guides and topics
- Progress tracking

SYSTEM OF PRODUCTS

Support best practices with the right system of products

From intuitively designed kits to innovative products, each system helps frontline staff effectively prevent CAUTIs.

Appropriate IUC use

This collection of alternative products gives caregivers the tools they need to follow best care practices for appropriate IUC use.

[Explore](#)

BioCon Bladder Scanners

Uses BladderPoint technology for accurate measurements that help staff evaluate if an IUC is necessary.

Men's Liberty Acute External Catheter

Our external Men's Liberty Acute External Catheter supports your prevention as an alternative to IUCs.

Total One Layer Intermittent Catheter Tray

Organized to help caregivers follow proper aseptic insertion technique.

Proper insertion and maintenance

We've created a system of products with innovative packaging that ensures caregivers have everything they need for insertion and maintenance of IUCs in a standardized, best practice way.

[Explore](#)

Total One Layer Kit

Nurse-designed, this patented tray is sequenced to guide aseptic IUC insertion step by step.

ReadyCleanse Catheter and Perineal Care Cloths

Soft cloths soaked in a pH solution for cleaning the perineum before and after catheter insertion.

SafeSecure Foley Catheter Securement Device

Preferred by 95% of polled nurses, SafeSecure is gentle on the skin and minimizes urethral traction.

See how Men's Liberty Acute external catheter reduced the use of IUCs by 19%

[Watch video](#)

78% of surveyed nurses say our Total One Layer Tray supports better aseptic technique.
